

# THE PRICE OF OIL IS TOO HIGH

**ORGANIZE** a demonstration for peace at your local petrol station, on February 4th. On that day, hundreds of petrol stations across the country and around the world will be targeted as we send a clear message that access to oil is not worth war.

Leafleting, vigils, street theater, and other forms of nonviolent direct action are all encouraged. Our intent is to communicate through education and peaceful confrontation that clean energy alternatives to oil exist, and that they can increase our security and give us true energy independence.

To organize a demonstration in your area, visit [www.targetoil.com](http://www.targetoil.com) or [www.risingtide.org.uk](http://www.risingtide.org.uk) download organizing materials and background information and register your rally.
